

CASE STUDY

York Place, Battersea

London, SW11

Sub Contractor: J Reddingtons
Architects: Patel Taylor
Engineer: Waterman Group
Market Sector: Ground Heave Solutions
Product: Cellcore HX S, Cellcore HX B, Heaveguard

The development at York Place included the demolition of a former retail warehouse and the construction of 254 new homes along with the new purpose-built headquarters of The Royal Academy of Dance. Designed by Architects Patel Taylor, the aim of the scheme was to create a mixed use building which contributes to the community on both local and cultural levels. Cordek supplied the Cellcore HX and Heaveguard to combat the effects of ground heave on the foundations.

Summary

A combination of 4500m² of Cellcore 160mm HX S 9/13 and 1040 Linear metres of Cellcore 155mm HX B 18/24 and 1400m² of 50mm thick Heaveguard was installed by the appointed sub-contractor J Reddingtons to meet the requirements for medium heave potential.
